

Give-aways, mailing boosters and sustainable customer gifts 🇩🇪 Made in Germany

ACCESS!ZER® password trainer

Sustainable password protection without plastic.

The sustainable advertising medium on the topic of data security

Our ACCESS!ZER offers password security „to go“ in the form of a card in EC card format - free of PVC, crude oil or plasticisers, biodegradable.

With the Accessizer, there is no need to remember complicated passwords in future - quite the opposite: a simple word is translated letter by letter into a cryptic and complex password. For this purpose, each individual card has its own crypto-code. After just a few uses, a learning effect occurs and makes the input easier.

Design example
